Solution design by Core team with 50+ years of combined hands-on experience in manufacturing, supply chain processes, automations, ERP's and MIS applications in fortune 500 companies

Developed by 11 members Tech team with 20+ years of experience in developing state of art and secure enterprise softwares

Enabling Amazon
Level Logistics

Integrated Supply chain

Extensive Fulfillment Network
Presence in 126 Cities

Flexible warehousing Model
Pay per use

Inciflo
Sophisticated Tech Platform
to manage Manufacturing & logistics

World class Infrastructure vertically integrated with singular software platform

Warehousing Network – The Godamwale Advantage

- Network of 200+ A-grade facilities in 126 cities across India with trained resources to handle complex supply chain operations.
- All facilities in our network are layered with one technology platform for centralized real time track and trace of inventory, orders and movements
- Flexible warehousing – Flexibility to scale up or down as per the business requirement with Pay-per-use warehousing model and no long-term commitments
- Minimum capex requirement to start new inventory base in less than a week
- Standard SOP's, SLA's and pricing pan India

Shared Warehousing | Dedicated Warehousing | B2B & B2C Fulfillment | Kitting | Custom Packaging | Retail distribution | Freight – FTL/LTL/Parcel | Forward stocking | Cross Docking

Make Logistics your competitive advantage

Logistics Services

B2B Services

- Short/Long term Shared/dedicated space
- Inventory Management
- Bulk Break
- Wholesale Carton Pick
- Labelling & Barcoding
- Packaging & Repackaging
- Container Handling
- Transportation & Distribution Services
- Technology (Sales/purchase order, inventory, and transport management tools)
- Dedicated Account Managers

Ecommerce Fulfilment

- Flexible Fulfilment Centres
- Order Management
- Pick, Pack and Ship
- Labelling & Barcoding
- Kitting Projects
- Last Mile delivery
- Courier services & Reverse Logistics
- Integrations with ecommerce platforms and courier partners
- Dedicated Account Managers

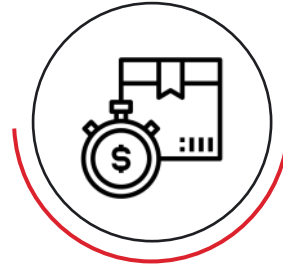

Technology & Infrastructure Network Vertically Integrated For End To End Benefits

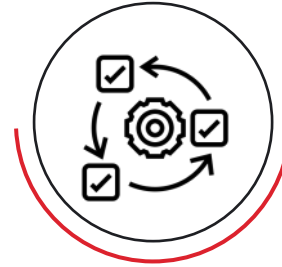

Place your inventory near to customer base without spending own capital or long-term lease
Reduce TAT, Quick replenishment, Avoid stock outs.

Lean inventory model – Save capex tied up in storage and transit

Flexibility and speed to scale, save money on unutilized space & fixed costs

Agility and resilience to respond to market dynamics and disruptions

Orchestrate the end to end supply chain from your manufacturing line to end customer from one software & one network

Retrieve any analyze historical inventory levels, SKU's performance for forecasting and demand planning

Real time Operational Visibility

- Access to real-time data related to the inbound/outbound processes, orders across all facilities on one platform
- Transparent, predictive and agile supply chain. Responsive to supply chain disruptions.
- Efficient process- Removes multiple emails, texts, calls and follow up for operational visibility
- Better planning and accurate delivery promises to improve customer experiences

****This is representative workflow; our multiple modules works for any flow and any business with real time visibility***

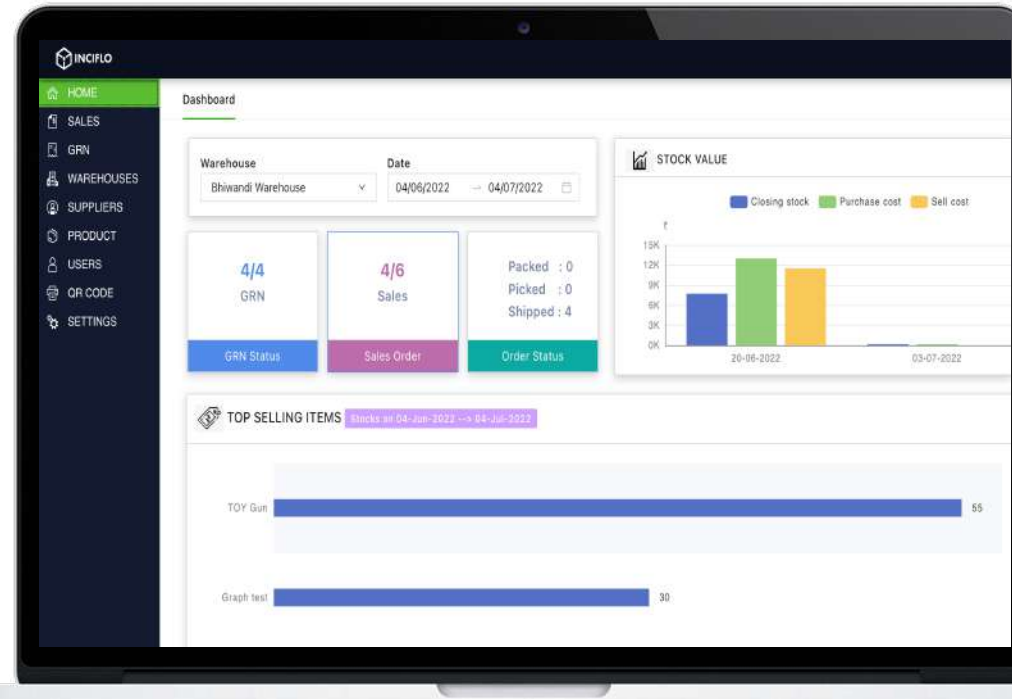

The Command centre

Plug and Play intuitive dashboard with customized KPI/parameters to track the matrices that matter

Aggregated view of all inventory and orders to all stake holders

Actionable insights to streamline daily activities and quickly address exceptions.

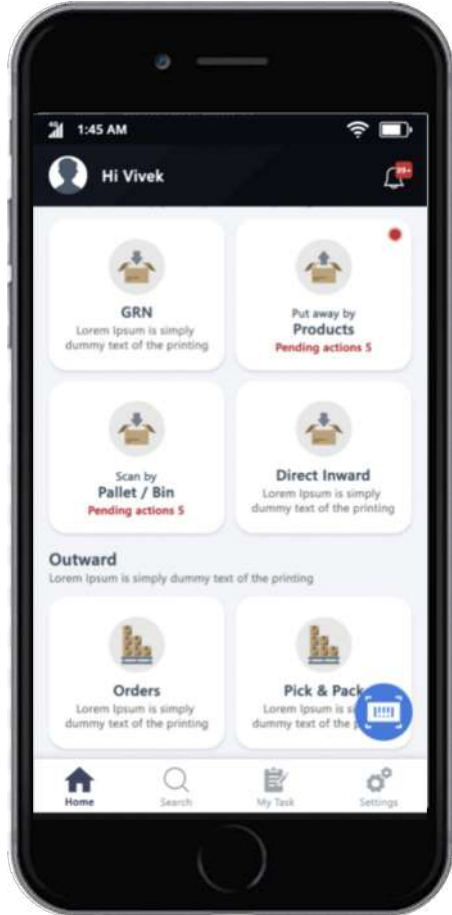

One click drill down to bottom and minute levels of data.

INCIFLO Floor Operator – App

Move your system to speed and traceability of QR code and barcode at no additional cost.

In-built mobile scan-based system to perform entire floor operations

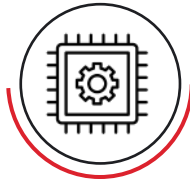

Easy to use navigation, designed with the feel of e-commerce experience

Minimal manual interventions, High data reliability

Low learning curve, Multilingual features - can be operated by semiskilled workers

Increased visibility of transaction while handling operations

Quick deployment and training

Technology

To Place Right inventory at Right Place at Right time

Manage entire network of production units and warehouses from one platform

Real time visibility to processes, production, orders and inventory across entire network that ensures procurement, planning and production systems are operating on the same data.

Optimize production, inventory levels, avoid stock outs & grow your business.

Data analytics
Pinpoint tracking – Components, SKU, pallet, location
Multi attribute tracking: Batch ID, bag No, serial/LOT no, expiry etc

Real time geographical, seasonal and SKU wise data with current trendlines to improve forecasting

- 99% Order within SLA
- Smart inventory placement to Serve customer faster
- Improved production timetables and delivery schedules lead to positive customer experience helping in acquiring and retaining customers.

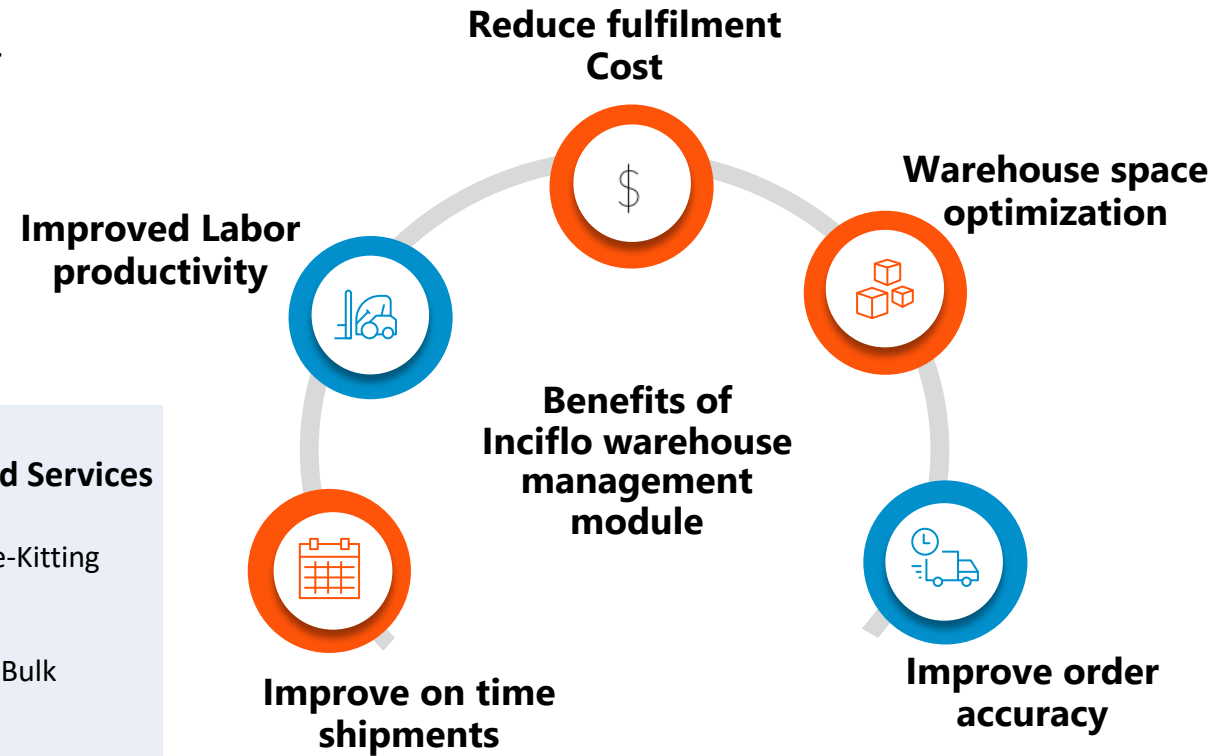

INCIFLO – Warehouse Management Module

to manage your own warehouse

- The simplest yet most powerful WMS system designed to improve the operational efficiency, accuracy and empower the floor operators
- Manages all business types and operations – B2B & B2C
- Handle any size of warehouse and SKU's & operational complexity

Inbound Logistics	Inventory Control	Outbound Logistics	Value Added Services
ASN/GRN	Lot, Batch, Serial Nos, Multi attribute tracking & genealogy	Multiple pick methods	Kitting/de-Kitting
Planned cross docking	Consigned & Vendor managed inventory	Packing and containerization	Break Bulk
Returns processing	Cycle Counting		
Quality inspection	Advanced Replenishment & Task Management		
Automatic pick list and put away	Replenishment		

INCIFLO – Learn, Innovate & Automate

The Advantage of Cloud

No Physical installations, up & running in weeks, can be deployed globally, quick troubleshooting , 99.9% server uptime

CLOUD SAAS

We learn, innovate, update the latest technology and best industry practices adopted globally and deploy as our regular products updates and features.

INNOVATIONS

No limitations on volume, orders, and transactions. Our smart server architecture automatically scales with the volume of your transactions for a seamless experience

UNLIMITED SCALABILITY
